

MANOJ KUMAR MAMIDI

BACKEND DEVELOPER

Summary

Experienced Back End Developer with a demonstrated history of working in the information technology and services industry. Skilled in Microsoft Word, Java, Eclipse, Spring, Hibernate, Node Js and Front-end Development. Strong engineering professional with a Bachelor of Technology - BTech focused in Computer Science from Kalasalingam Academy of Research and Education which is located in Madurai,TamilNadu

Employment

Virtusa Consulting Services Chennai
Software Developer Aug. 2019 to Current
As a developer, I develop highly scalable backend applications using Java as programming language and spring MVC as a Framework

Projects

Recruitment Process System Oct. 2019 to Nov. 2019
This project is basically a recruiting system where students can register to a particular company and the company HRs will add jobs according to the organization's requirement. Interested students will apply that job and the respective hr for that job will conduct the interview process for that group of students who applied for that job

LMS - Learning Management System June 2018 to Jan. 2019
This project is basically a learning platform for students in which students can login using their registration and learn the respective courses as their mentors provided some courses. The students can also practice the basic programming questions in the online compiler as an assignment which was given by the mentor

Bingo - Multiplayer Game May 2020 to Current
This project is basically an online multiplayer game in which players can create rooms where only two players can join in that room and play that bingo game, I built this project using node js as a backend server and HTML bootstrap as Frontend development.
