PROJECTS

- **INVENTORY MANAGEMENT**

  I have developed a Java program on Inventory managers which lead a team of inventory or warehouse workers to receive and record new stocks as it comes in and move stock on to trucks or shelves as needed.

- **ONLINE HOTEL MANAGEMENT**

  In this project, a hotel room booking can be done by using internet or website.If particular hotel is to be searched then it will be automatically display the following details such as Room availability,Food facilities, Water facilities and Entertainment facilities.

- **KISAN (The Curse Healing)**

  In this project,I have developed a Android Application for the usage of farmers.Through this application we want to solve problems like identifying the major pests and diseases on different crops in their own languages and also to make people as part of digitalization and to get the chemicals that are required for farmers easily

- **ONLINE STUDENT INFORMATION SYSTEM**

  I have developed a website using Java.This project deals student information studying in a college.It gives all information about the student like marks details,course details,personal details ,attendance details etc.,.It is very much helpful for the students to know their current scenarios in
  their college.
